Profile

I am a skilled software developer with experience in JavaScript, TypeScript, and expertise in frameworks like ReactJS, Node.js and React Native. I'm a quick learner, hard-working both individually and in teamwork to create efficient, scalable, and user-friendly solutions that solve real-world problems. I am also a hardworking and passionate job seeker with strong organizational skills eager to secure entry-level Front-end Developer position. Ready to help team achieve company goals.

Project History

HARIDI website

An online store that has been completed in terms of interface and fully integrated with features such as login, registration and management on the admin side.

Hari-Learn application

A fullstack MERN (MongoDB, Expressjs, ReactJS, NodeJS) app using jsonwebtoken-based authentication and basic CRUD operation with RESTful API.

E-commerce website

Build an e-commerce website - with PHP, has most of the features that satisfy user experience, based on the MVC pattern, using MySQL, with functions to register, log in, update account information, manage product categories, cart, order.

Shopee clone using plain HTML/CSS

Design and build a responsive website - a popular online shopping platform in Asia with plain Vanilla Javascript HTML/CSS, works nicely on all devices.

Music-player & Tiktok clone

Design a music Player written in Vanilla JS with many features and a small ReactJS app that replicates Tiktok Interfaces with some additional 3D models (ThreeJs + react-three/fiber + react-three/drei), RESTful API with axios.

Education

Bachelor of Science in Computer Science, University of Information Technology and Management in Rzeszow, Rzeszów

October 2020 — October 2023
